This Guide is for use with the NAPIT Application Form for electrical operatives, it is not a guide about electrical qualifications in general or for joining any organisations or schemes other than those shown on the form.

The document that details the requirements for registration bodies (including qualifications) is the IET's *Electrotechnical Assessment Specification for use by Certification and Registration Bodies* (January 2020). This Guide expands on the IET specification by giving details of actual qualifications issued (both current and withdrawn) that meet its requirements.

Changes to the EAS Specification coming into force as of the 1st September 2021 has introduced new entry routes for applicants wishing to register for electrotechnical work.

The EAS work categories are as shown in the table below:

In addition this Guide provides information about qualifications recognised by NAPIT in electrical work not covered by EAS.

Index of Qualification Lists against scope of Registration

EAS Work Categories:	Underpinning Core Technical Competence		Wiring Regulations	Initial Verification	Periodic Inspection and Testing
	Dwellings	All			
	Lists 1/2/3	Lists 2/3	List 4	List 5	List 6
A1 Electrical installations up to and including 1000V AC or 1500V DC					
A1.1 Dwellings (BS 7671)	✓	✓	✓	✓	
A1.2 Other than Dwellings (BS 7671)		✓	✓	✓	✓
A1.3 Temporary electrical systems (BS 7909)*		✓	✓	✓	✓
A1.4 Dwellings - defined scope (BS 7671)	✓	✓	✓	✓	
A2 Periodic inspection and testing:					
A2.1 Dwellings (BS 7671)		✓	✓		✓
A2.2 Other than Dwellings (BS 7671)		✓	✓		✓

*A1.3 also requires BS 7909 training included in List 8

Categories outside EAS:	
Portable appliance testing	List 7
Temporary electrical systems	List 8
Electric vehicle charge points installation	List 9
Fire detection and fire alarm systems	List 10
Third Party Certification (MHCLG Authorised)	Lists: 2/3, 4, 5 and 6

©NAPIT Registration Ltd

The application form asks you to use Codes from one or more of the ten lists included in this Guide, please pay careful attention to the notes on the application form to see which parts of the form you need to complete.

To use this guide, look for the qualifications you hold in the following tables where you will find a **NAPIT Code** in the left-hand column, then use this code on the application form. If you have more than one qualification in a particular list, please indicate the one most recently awarded. The columns to the right hand of the tables give information that could help you to identify the qualification from the awarding body named on the certificate or the Ofqual number if it is shown.

If you have a qualification that you believe demonstrates electrical competence, but it is not listed, please contact NAPIT so it can be reviewed by our Schemes Department. Such a review may not be conclusive and might indicate the need for work by other agencies such as the awarding body for the qualification, the Sector Skills Agency responsible or, in the case of an overseas award the UK National Recognition Information Centre (NARIC).

Important note for anyone applying as an EXISTING OR PREVIOUS (last 2 years) REGISTERED COMPETENT PERSON

Registration is available for someone transferring existing registration from another certification body or registering within two years of any previous registration with NAPIT or another certification body. Provided evidence is available of previous successful assessment(s), the scope of registration in this case will be the same as that currently/previously held, and the only qualifications evidence required is the Wiring Regulations Qualification from List 4 of this guide. If applying for a higher scope than previously held (e.g. previously a Domestic Installer but applying for All Electrotechnical Work), the qualifications requirements must be met and sections D, E, F and G must be included on the form.

Important note for anyone applying for DEFINED SCOPE work in dwellings only

Defined scope electrical work in dwellings (EAS scope A1.4) is work related to a non-electrical trade (e.g. providing an electrical supply to a heating system) and registration is limited to electrical work involved in that limited trade. Prior to June 2014 a number of limited qualifications were recognised for defined scope, but the current requirements are for the same degree of qualification as those for electrical work in dwellings generally and the only difference for a defined scope registrant is that the electrical work to be inspected will be limited to the trade involved.

Important note about RESPONSIBILTIY requirements

Other than someone with existing or recent registration, applicants must have demonstrable evidence of 2 years' responsibility for technical standards of electrotechnical work and evidence of ongoing Continuous Professional Development. Section G of the application form can be used for this, although NAPIT may ask for further evidence. Practical experience gained whilst undergoing training is valid.

Important note about SITE ASSESSMENTS

Qualifications or certificates of competence are required for registration, but competence itself must be demonstrated in practice and the site assessment element of the application process must also be satisfactorily completed. If the assessment finds weaknesses or evidence of a lack of competence NAPIT can require additional or repeat training and assessment in order to complete registration.

©NAPIT Registration Ltd

LIST 1 – Underpinning Core Electrical Competence, limited to dwellings only

This is suitable for electrotechnical work applications within dwellings. This qualification also covers initial verificationso you will not need an additional qualification from list 8.

Since the 1st January 2019 it has been a requirement to hold a separate BS 7671 18th Edition qualification unless it can be evidenced that the qualification taken included the 18th Edition. The evidence will be subject to review by NAPIT.

List 1: Underpinning Core Electrical Competence, limited to dwellings only		***For information***

LIST 2 – Underpinning Core Technical Competence, all Electrotechnical Work including dwellings

This is suitable for all electrotechnical work including in dwellings. These qualifications also cover initial verification so you will not need an additional qualification from list 5.

Since the 1st January 2019 it has been a requirement to hold a separate BS 7671 18th Edition qualification unless it can be evidenced that the qualification taken included updates to the 18th Edition. The evidence will be subject to review by NAPIT.

LIST 7 – PORTABLE APPLIANCE TESTING QUALIFICATION

If you have applied for Portable Appliance Testing you must have one of the following qualifications (none of the other lists cover PAT requirements). If your company has applied for "Managing the Maintenance of Electrical Equipment" they will need to provide evidence that someone within the company has a level 3 in "Management Requirements for the Maintenance of Electrical Equipment" for which the following listed qualifications are a prerequisite.

N.B. EP702 and EP703 qualifications pre-date the new Code of Practice and as applicants holding these will need to pass the OAS and on-site assessment.

LIST 7 – PORTABLE APPLIANCE TESTING QUALIFICATION		***For information***
